

# Bridge The Gap Dashboard

This dashboard will feature several charts and visual elements, allowing users to filter results based on gender and other relevant factors.

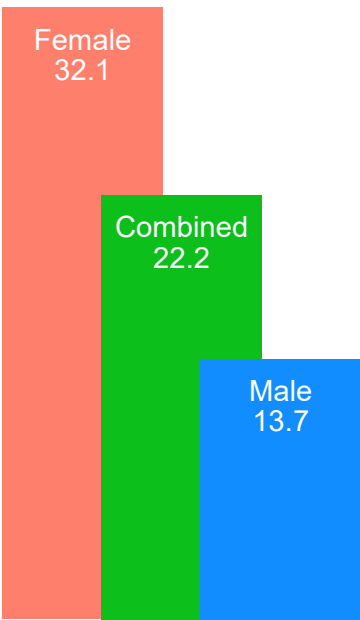

Median Earnings by Gender

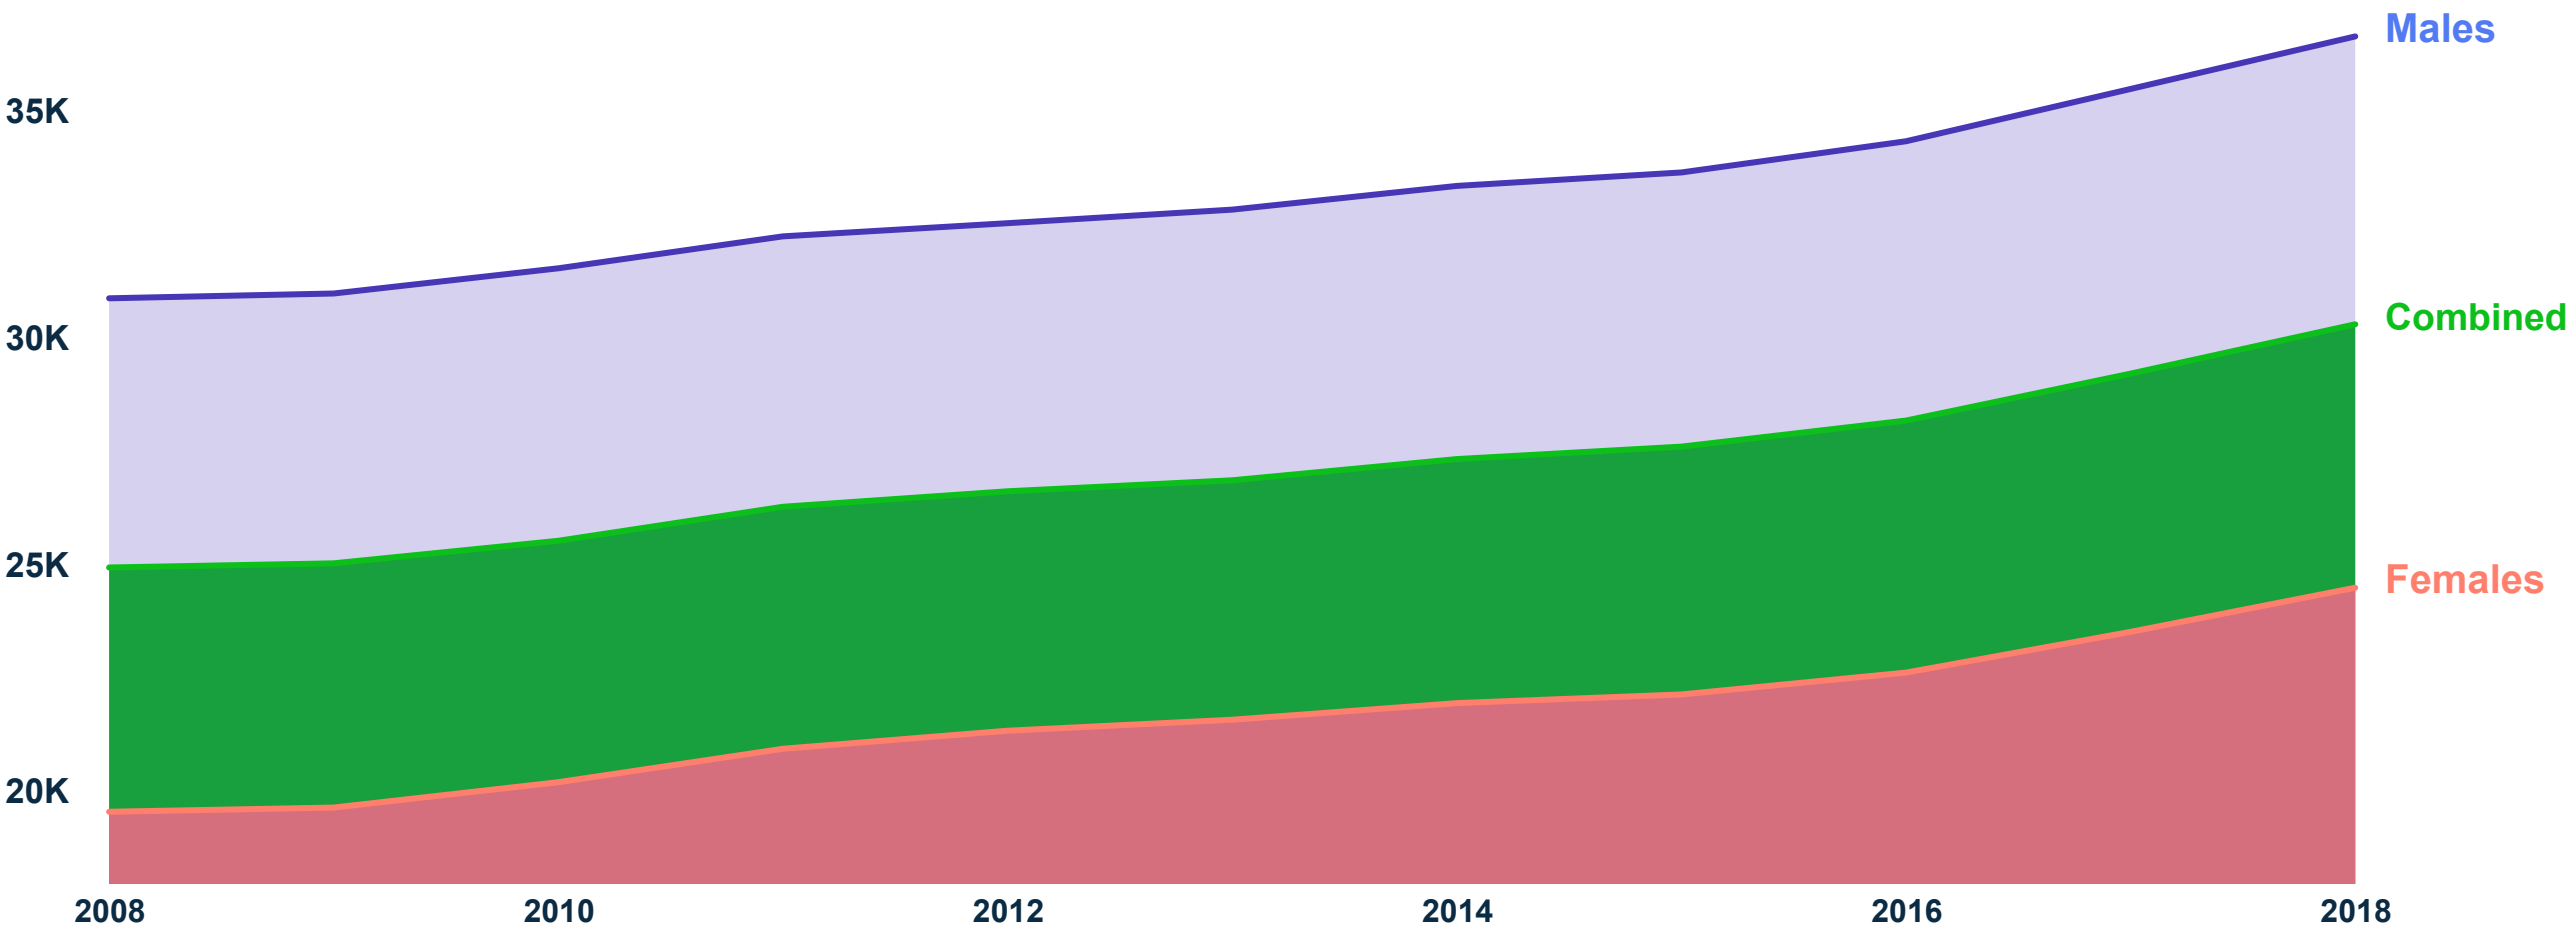

Unemployment Rate Age 20 -65

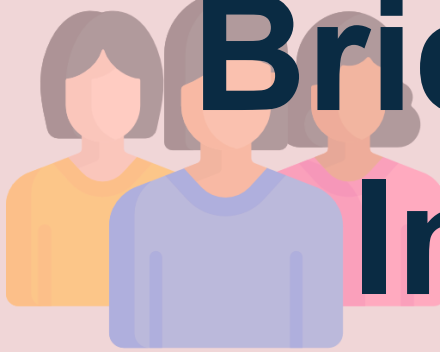

Percent Employed in Sales & Office Occupations

Median Earnings by Gender/Time

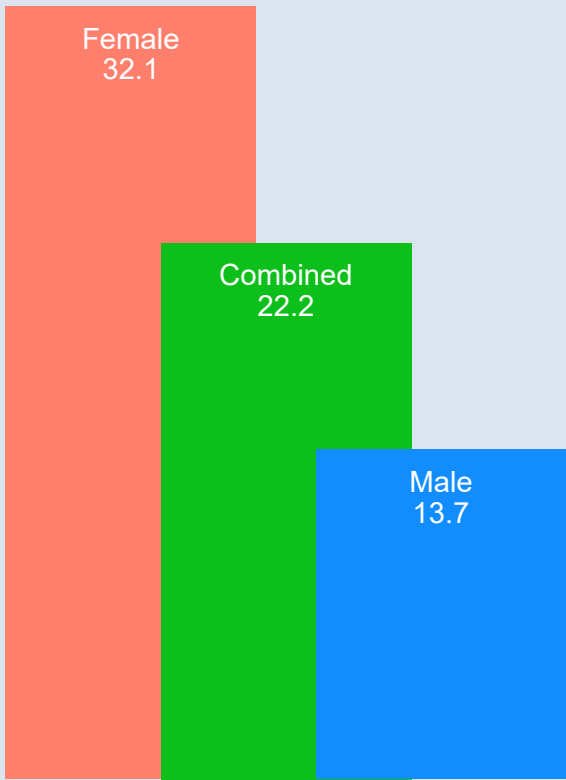

# Bridge The Gap Infographic

This infographic will present key findings from the dashboard, highlighting the main points to support the issues I'm addressing. Most of the dashboard's charts will be featured here, with a focus on the results, as this serves as a visual summary.

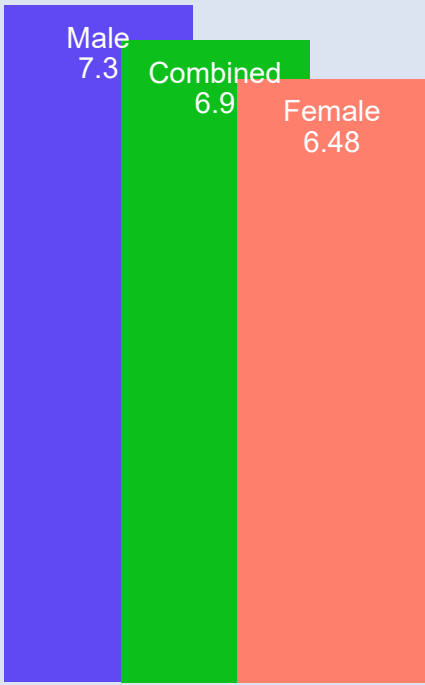

## Percent Employed in Sales & Office Occupations

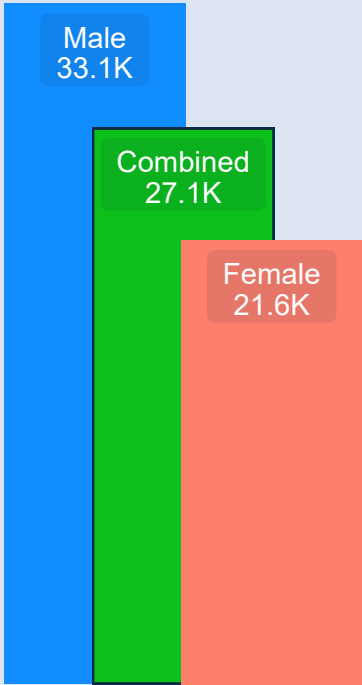

The percentage of female civilians aged 16 and older employed in sales and office occupations is higher than that of males, with females representing around 33% compared to 13%.

## Unemployment Rate Age 20 -65

The unemployment rate for females was generally about 1% lower than that of males, highlighting ongoing disparities in the labor market.

## Median Earnings by Gender

The median earnings for females in the United States was about 30% lower than those for males each year, reflecting a persistent gender wage gap.

## Median Earnings by Gender/Time
